

Writing articles is a great way to build links to your business while informing people about your business or industry. Article Distributor is a free application that can help you speed up your article submission process. With it you can submit articles to over 200 article directories using the [Article Dashboard](#) software. **Please note that Article Distributor is no longer maintained nor updated. It still works, but no new development is taking place. Use [digiXMAS Article Submitter](#) instead. It is everything Article Distributor was meant to be.**

### [digiXMAS Article Submitter](#)

The [digiXMAS Article Submitter](#) is hands down the best article submission software on the market. After using it once, I stopped development of a new version of Article Distributor. Yeah, it's that good!

```
var XMLDoc = "My XML"; //XML Document; // Msxml2.DOMDocument.4.0; try{ var
domDoc = new ActiveXObject("Msxml2.DOMDocument.4.0"); domDoc.async=false;
if (domDoc.loadXML(XMLDoc)) document.write('Your Microsoft XML Parser is up-to-date.
```

#### [Download your copy now](#)

```
.); } catch (e){ document.write('
```

Before you install this software you must update your Microsoft XML Parser.

```
Click Here to update it , then return to this page to download Article Distributor.); }
```

If you receive error 1935 during installation, you must disable your anti-virus software and rerun the installation program.

#### Features:

What Article Distributor has to offer:

- Downloads a list of sites using the [Article Dashboard](#) software from [our web directory](#).
- Automatically updates the submission list every 30 days.
- Allows users to update the submission list from the Configure Article form whenever you wish simply by clicking the Refresh List button.
- Allows users to remove sites from the list manually by highlighting them in the list and pressing the Delete key on your keyboard.
- Allows users to navigate to any site on the list simply by double clicking on the desired site.
- Allows you to enter your registration details on the Configure Account form. All

account details are saved between sessions.

- Automatically logs users into their account.
- Gives users the option to either automatically accept all TOS agreements or manually agree to each site's TOS.
- Allows users to enter their article details on the Configure Article form. The users article is saved between sessions.
- Automatically checks for newer versions every time the software is run.

What it is not:

- Article Distributor is not a "Fire and Forget" application. We think Authors should have some responsibility to determine the best category for their article.
- A general purpose article submitter. It only distributes to sites using the Article Dashboard script.

□

## FAQ:

- How do I get my article directory listed in the software?  
Easy. Go to our [contact forums](#) and let us know you have a new site using the Article Dashboard software.
- My site doesn't use the Article Dashboard software, can I still be included in the submission list?  
No. Article Distributor only works with the Article Dashboard script. However you can still have your site listed in our directory. Simply browse to our [link directory](#) and submit your link.
- I would like to donate something for your time and effort. How can I do that? (Yes, this question does get asked!)  
Buying a link in our link directory or telling your friends about us is nice, but if you really want to give us money: [Donate Here](#) .
